

## Calibration Weight Kit / Engine Dynamometer

### Calibration Weight Kit

Dyne Systems' Calibration Weight Kit allows for accurate readings every time you calibrate and it takes only seconds to add and remove weights.

The Calibration Weight Kit key features include:

- Weights meet National Institute of Standards and Technology Class 6 tolerances
- Snap shackle makes adding and removing equipment simple and easy
- All of the hardware included attaches to your current Dyne Systems' calibration arm
- Set up time is less than 5 minutes

*Everything you need to succeed*

Dyne Systems is a division of Taylor Dynamometer
