The DynPro₂ Instrumentation Boom features:

- Easy installation
- Double articulation allows the Instrumentation Boom to be stored closer to the wall, offers easier movement and a wider swing path
- Instrumentation Boom allows Sensor Box to rotate 315 degrees
- Allows for rapid installation and removal of testing equipment
- Keeps pressure and temperature signal cables off the floor
- Provides a cleaner and safer work environment by keeping walkways clear
- Provides a professional appearance to your test cell
- A vertical solution when testing multiple engine types and sizes
- Total Instrumentation Boom length is 13.25 ft (4.03 m)
- Fire retardant sleeve
