

Calibration Weight Kit

Dyne Systems' Calibration Weight Kit allows for accurate readings every time you calibrate and it takes only seconds to add and remove weights.

The Calibration Weight Kit key features include:

- Set up time is less than 5 minutes
- Standard weights can be NIST traceable (National Institute of Standards and Technology) additional charges apply
- Snap shackle makes adding and removing equipment simple and easy
- All of the hardware included attaches to your current Dyne Systems' calibration arm

Everything you need to succeed
