

Rebuild, Remanufacturing and Repair Services

Before, during and long after the purchase, the people of Dyne Systems stand behind their products and services providing complete confidence in and accountability for superior performance. Dyne Systems helps customers get the most out of their testing equipment over its entire life cycle.

■ Rebuild and Remanufacturing Services

Dyne Systems' proven rebuild and remanufacturing capabilities provide quick turnaround on all dynamometers, equipment and accessories limiting your overall downtime. With a standard turnaround time of 6 to 12 weeks for dynos, Dyne Systems remanufactures your equipment to a "like-new" condition and provides our standard warranty on all complete remanufacturing projects.

Rebuild and Remanufacturing Process:

- Inspection of all components
- Cleaning
- Sandblasting (as required)
- Balancing
- Factory testing
- Painting
- Labor and all required parts

Other brands serviced include:

- GE - General Electric
- SAJ
- Borghi & Saveri
- Schenck

Dyne Systems is the sole owner of original OEM drawings and specifications for Midwest® and Dynamatic™ dynamometers, and the only authorized repair shop for these brands.

■ Repair Services

Dyne Systems can repair broken or damaged parts on most Dyne Systems' dynamometers, equipment and accessories. Depending on the type of repair service needed, repairs can be performed at your facility or at Dyne Systems.

Everything you need to succeed
